Arize Hotel Sukhumvit

Vanceva® lights the way to a grand entrance

The Arize Hotel Sukhumvit in Bangkok, Thailand, conveys a contemporary vibe with its sleek interior styling and metallic finishes. To have a stunning first impression for guest visiting Arize Hotel Sukhumvit in Bangkok, the architect created a blue hue illuminated glass ceiling that leads guest into the reception area. With its unique pattern and tranquil color, "Pollo" glass was used to set the mood of modernism and relaxation in the reception zone. The deep blue sea tone was created using two layers of Vanceva® Sapphire colored interlayer. Using laminated glass in an overhead application ensures all safety concerns are met. The resulting effect is one of modern, unparalleled luxury in the heart of one of the world's busiest cities.

About Vanceva®

Producing a broad spectrum of colors and moods that are unachievable using stock selections of glass, Vanceva color by Eastman gives architects and designers more creative freedom with glass than ever before. Vanceva color interlayers can be combined to produce more than 2,000 transparent, translucent, or opaque color options to help create the desired tone and intensity. When Vanceva color interlayers are combined with tinted or reflective glass, the design possibilities are nearly limitless. No other interlayer brand delivers the complete spectrum of colors for laminated glass like Vanceva colors.
