

## Vanceva® World of Color Awards™ Honorable Mention, AP

### Project information

Project: Rainbow Glass Cliff

Location: East Lake Harbor Canyon, Beijing, China

Glass laminator: Beijing Guanhua East

Distributor: Tianjin Wancheng

Project year: 2016

**Glass configuration:** 15-mm + Vanceva + 15-mm low iron, 6-mm heat soak FR + Vanceva + RB41 + 6-mm heat soak FT for the balcony, and 15-mm heat soak FT + RB71 + 15-mm heat soak FT for the glass floor

**Featured product:** Vanceva® interlayers 0001 0002 0004

0006 0005 000E 000C

Firm: Beijing Xinmei

## Vanceva® makes balcony design a real cliffhanger.

### *Breathtaking views on Rainbow Glass Cliff in Beijing*

Imagine standing on a rainbow on the edge of a cliff overlooking a canyon. It may sound like a dream, but it's a very real experience for tourists visiting Beijing's East Lake Harbor Canyon.

China has been on the leading edge of many innovative architectural trends using glass and glazing. In this example, the architectural firm Beijing Xinmei delivered their interpretation of one of nature's most beautiful creations—the rainbow—using glass.

The glass balcony spans 128 m (nearly 140 yards) across a cliff of the canyon. What makes this feat even more stunning is the colorful Vanceva interlayers used to create the progression of colors in a rainbow-like pattern on both the glass floor and railing.

Glass laminator Beijing Guanhua East supplied 15-mm heat soak FT + RB41 + 6-mm heat soak FT for the balcony railing and 15-mm heat soak FT + RB71 + 15-mm heat soak FT for the glass floor. Both the height of the railing and the width of the floor are 800 mm (2.6 feet) wide. Every year, approximately 500,000 people visit the bridge, which is only open during the summer season.

From sunup to sundown, on clear days or rainy days, walking along the balcony, or viewing it from below, the natural lighting passing through the colored panes makes Rainbow Glass Cliff a truly magnificent sight to see.

### **About Vanceva®**

Producing a broad spectrum of colors and moods that are unachievable using stock selections of glass, Vanceva® color interlayers by Eastman give architects and designers more creative freedom with glass than ever before. Vanceva color interlayers can be combined to produce more than 17,000 transparent, translucent, or solid color options to help create the desired tone and intensity. When Vanceva color interlayers are combined with tinted or reflective glass, the design possibilities are nearly limitless. No other interlayer brand delivers the complete spectrum of colors for laminated glass like Vanceva colors.
