Churrasqueira Gourmet
Vibrant Purple Hues Create Exciting Dining Experience

Purple is undoubtedly the central element of the Churrasqueira Gourmet, and the bright color serves as the inspiration for the fun and inviting atmosphere of the space. A backdrop of 750 purple bottles adds to this dynamic mood as the bottles, illuminated by the natural light of the sun, change in color intensity as the day progresses. The purple flavor is also repeated in the steel support beams, which were covered with stainless steel mirrors and laminated with purple Vanceva® interlayer to add a bright pop of color. The building is home to several different types of recreational activities.

One of the main features of the Churrasqueira Gourmet is the harmonious integration of nature into the design. The use of anti-glare glass provides all the comforts of the indoors, while allowing maximum interaction with the outdoor environment. And although the design of the building's exterior is decidedly modern, organic touches smoothly integrate the space into the existing natural landscape. Contrasting modern Vanceva laminated glass technology and steel beams with raw wood furniture and ceramic tile flooring also adds texture to the space. Architect Brunete Fraccaroli noted that, "The mix is certainly the strong point of the project."

About Vanceva®

Producing a broad spectrum of colors and moods that are unachievable using stock selections of glass, Vanceva color by Saflex gives architects and designers more creative freedom with glass than ever before. Vanceva color interlayers can be combined to produce more than two thousand transparent, translucent, or opaque color options to help create the desired tone and intensity. When Vanceva color interlayers are combined with tinted or reflective glass, the design possibilities are nearly limitless. No other interlayer brand delivers the complete spectrum of colors for laminated glass like Vanceva colors by Saflex. Used in curtain walls, atriums, skylights, partitions and conference rooms, Vanceva color interlayers allow the most expressive designs with distinctive hues from the subtle to the dramatic, all using the advanced interlayer technology you have come to know and trust in the Saflex brand.
